

### Power Outages— Do You Know What to Do?

## ALWAYS CHECK YOUR BREAKER

If you experience a power outage and haven't heard from us, take a quick moment to check your breaker at the transformer pole:

- If it's **OFF**, try resetting it by switching it back to **ON** as this might restore your power.
- If it's already **ON** or resetting doesn't help, call our 24/7 Emergency Line: **1-877-749-3655**

When reporting an outage, please provide the following:

- Your name
- Your legal land location
- Phone numbers where you can be reached

And remember, don't assume someone else has reported it. The issue could be unique to your property!

**\$250,000**  
in community initiatives.

24 Hour Emergency (1-877-749-3655)

## Yard Light Consumption Calculator

# CONSUMPTION CALCULATOR

As the days get shorter and nights grow longer, many farms and acreages keep several yard lights glowing to illuminate driveways, play areas, and livestock areas.

**Watts ÷ 1000 × Hours × Days in Month = kWh**  
**200 ÷ 1000 x 12 x 31= 74 KWH Per Light**

Use this calculation to check not only your yard lights, but all the devices around your home that could be quietly adding to your energy bill. Remember, little things add up! By staying aware and mindful of your energy use, you can take small steps that make a big difference in reducing your overall consumption.

## Switch to E-Billing Today

Join the 80% of Members already receiving their monthly statements through E-Billing. With possible postal delays, switching to email statements ensures you get your bill on time, every time.

All statements are due by the 20th of each month, and we offer several convenient payment options to make managing your account simple and reliable. Make the switch to E-Billing today and never miss a statement.
